Noah Frost DevSecOps Engineer

REDACTED REDACTED Newcastle upon Tyne noahfrost.co.uk

in https://www.linkedin.com/in/nfroze github.com/nfroze

Profile

DevSecOps Engineer focused on delivering secure, scalable cloud infrastructure with integrated security automation. Built 17 production systems in 4 months. Experienced in AWS, Kubernetes, and GitOps workflows, with expertise in shift-left security practices and compliance scanning. Strong background in SIEM integration, container security, and infrastructure as code. Proven ability to streamline deployments and strengthen security posture through automated CI/CD pipelines.

Skills

Cloud & Infrastructure: AWS (EC2, VPC, S3, IAM, EKS, ECS, Lambda, GuardDuty, CloudWatch), Azure, GCP

Container & Orchestration: Kubernetes, Docker, Helm, ArgoCD

DevOps & CI/CD: GitHub Actions, Git

Infrastructure as Code: Terraform, Ansible

Programming: Node.js, Python, JavaScript, Bash

Security & Compliance: Semgrep, Trivy, Gitleaks, OWASP ZAP, Checkov, Sentinel, OPA Gatekeeper

Monitoring & Observability: Prometheus, Grafana, Datadog, OpenCost, Splunk SIEM

Linux

Platform & Integration: Apache Kafka, Strimzi, Backstage, MLflow, Model Context Protocol (MCP)

Professional Experience

DevSecOps Engineer [Bootcamp], KubeCraft

07/2025 - Present | Remote

- Share technical insights from **17 DevSecOps projects** with **600+ member** community, demonstrating production implementations and architectural patterns
- Mentor engineers through code reviews and troubleshooting sessions, helping solve real-world infrastructure and security automation challenges
- Contribute to **3x weekly** community sessions, providing guidance based on hands-on experience building cloud platforms and CI/CD pipelines

DevSecOps Engineer [Self Directed], Self Employed

02/2025 - Present | Remote

- Designed and deployed 17 production-grade systems including Backstage developer platform achieving 70% cost reduction via hybrid EKS/ECS architecture, implementing secure clusters with Terraform and 100% Checkov compliance
- Built event-driven FinOps platform using Apache Kafka streaming (Strimzi operator) with OpenCost for real-time cost monitoring, achieving <30 second anomaly detection and increasing GPU utilisation from 60% to 85%
- Implemented Policy as Code governance using HCP Terraform Sentinel and OPA Gatekeeper on Kubernetes, preventing unauthorised resource provisioning and ensuring EU AI Act compliance
- Configured multi-cloud orchestration with **Ansible** and **Datadog** monitoring, deploying infrastructure across **AWS/Azure/GCP** in **12 minutes** using **GitOps** workflows
- Automated security scanning across CI/CD pipelines using GitHub Actions, integrating Semgrep (SAST), Trivy (containers), Gitleaks (secrets), and OWASP ZAP (DAST)
- Developed **Model Context Protocol** servers for Al-augmented operations, enabling natural language queries for **Kubernetes** cluster management and automated security incident analysis
- Integrated **Splunk SIEM** with **AWS CloudWatch** and **GuardDuty**, centralising security event monitoring with **Lambda** functions for real-time streaming
- Documented reference architectures creating **open-source** repositories with **700+ commits**, currently developing **AEGIS, FORGE, and SENTINEL** comprehensive AI security toolkit addressing **OWASP Top 10 for LLMs**

DevSecOps Engineer [Bootcamp], Cyber Agoge

09/2024 - 02/2025 | Remote

- Completed intensive 6-month DevSecOps bootcamp at one of UK's largest programs first graduate in program history invited by CISO to teach fortnightly project implementation lectures
- Conducted threat modelling exercises using **STRIDE** and **MITRE ATT&CK** frameworks, identifying vulnerabilities and designing security controls for enterprise cloud architectures
- Built and secured **AWS** infrastructure implementing **GuardDuty**, **VPC** security, and **IAM** policies with least privilege access controls across multi-tier applications
- Developed incident response playbooks and implemented **SIEM** solutions for real-time security monitoring with automated alerting for ransomware and DDoS scenarios

Police Constable, Metropolitan Police

02/2022 - 09/2023 | London, UK

- Completed rigorous police training through **Degree Holder Entry Programme (DHEP)**, developing investigative and analytical skills directly applicable to security incident response
- Selected as **Deputy Captain** by cohort peers, demonstrating leadership in high-pressure operational environments
- Held **RV/CTC clearance**, demonstrating proven vetting for sensitive roles and trustworthiness required for handling critical infrastructure

Projects

Multi-Cloud Orchestration

- Built unified platform deploying AWS, Azure, and GCP infrastructure simultaneously in 12 minutes
- Implemented GitOps workflow with GitHub Actions triggering parallel Terraform provisioning across all clouds
- Developed OS-adaptive Ansible playbooks detecting RedHat/Debian for consistent nginx configuration
- Deployed Datadog EU agents providing single-pane-of-glass monitoring with 100% configuration parity
- Configured unified SSH keys and security groups across VPC, VM, and compute resources

⚠ Al Governance Framework

- Built dual-layer governance with Sentinel and OPA blocking £10K+/month unauthorised GPU provisioning
- Implemented HCP Terraform policies preventing p3.2xlarge instances (£3.06/hr) before provisioning
- Deployed **OPA Gatekeeper** on **AWS EKS** enforcing **ML model** tracking with clear policy violations
- Achieved 100% compliance with mandatory versioning and team attribution via Kubernetes admission control
- Reduced **EU AI Act** compliance reporting from 2 weeks to 2 hours through automated audit trails

& Al FinOps Platform

- Built real-time cost platform processing millions of events through Apache Kafka streaming on AWS EKS
- Deployed Strimzi Kafka operator with 3 brokers and 23 partitions for GPU and API cost events
- Implemented OpenCost, Prometheus and Grafana achieving <30 second anomaly detection
- Prevented £100K+ monthly overruns through event-driven monitoring of **gpu-utilisation** and **ai-api-costs**
- Configured complete **Terraform** infrastructure with **VPC** networking and **Helm** chart deployments

TAI Developer Platform

- Built self-service platform reducing AI model deployment from 2 weeks to 30 minutes using Spotify Backstage
- Architected hybrid EKS/ECS design achieving 70% cost reduction through intelligent workload placement
- Integrated MLflow for model tracking and OpenCost for real-time GPU cost monitoring
- Deployed **GitOps with ArgoCD** managing **Helm** deployments across development and production
- Configured AWS infrastructure with Terraform including EKS clusters, ECS Fargate, and IAM roles

MCP Meets K8s

- Implemented one of first Kubernetes MCP integrations enabling natural language cluster operations
- Built production DevSecOps platform with AWS EKS, ArgoCD GitOps, and Prometheus/Grafana
- Enabled AI troubleshooting where "What's broken?" returns instant analysis with remediation
- Integrated Checkov, Semgrep, Gitleaks, Trivy for complete security scanning pipeline
- Deployed Terraform infrastructure with Node is MCP server connecting to Claude Desktop

GitOps with ArgoCD & Monitoring

- Deployed production GitOps workflow using ArgoCD on AWS EKS achieving 2 minute deployments
- Implemented **Prometheus** and **Grafana** observability stack via **Helm** charts with pre-built dashboards
- Configured self-healing Kubernetes deployments where ArgoCD continuously ensures cluster matches Git state
- Resolved complex Prometheus CRD failures using ServerSideApply and debugged DNS/Terraform issues
- Built Terraform modules for complete AWS infrastructure: VPC, EKS cluster, IAM roles with least privilege

End-to-End DevSecOps Transformation

- Built secure CI/CD pipeline using GitHub Actions with integrated security scanning across SDLC
- Deployed to AWS EKS with Docker containerisation and Kubernetes orchestration
- Automated security tools: Semgrep (SAST), Trivy (containers), Gitleaks, OWASP ZAP, Checkov
- Developed Lambda functions for GuardDuty to Splunk SIEM streaming via CloudWatch events
- Achieved 100% IaC automation with Terraform provisioning VPC, EC2, S3, and IAM security

CompTIA Security+

AWS Certified Cloud Practitioner

HashiCorp Certified: Terraform Associate

AWS Certified Solutions Architect - Associate - IN PROGRESS

Education

Law (Criminal Justice) LLM, Northumbria University Final Term Paused

09/2023 - Present

Criminology BSc (Hons), University of Chester

09/2016 - 09/2020
