👤 Profile

DevSecOps Engineer focused on delivering secure, scalable cloud infrastructure with integrated security automation. Built 17 production systems in 4 months. Experienced in AWS, Kubernetes, and GitOps workflows, with expertise in shift-left security practices and compliance scanning. Strong background in SIEM integration, container security, and infrastructure as code. Proven ability to streamline deployments and strengthen security posture through automated CI/CD pipelines.

🧠 Skills

AWS: EC2, VPC, S3, IAM, EKS, ECS, Lambda, GuardDuty, CloudWatch   **Kubernetes:** EKS, Helm

Security Scanning   **CI/CD:** GitHub Actions   **Containerisation:** Docker

Infrastructure as Code: Terraform   **GitOps:** ArgoCD   **Incident Response**

Monitoring: Prometheus, Grafana, Datadog, OpenCost   **SIEM:** Splunk   **Version Control:** Git

Compliance: ISO 27001, NIST   **Multi-Cloud:** AWS, Azure, GCP   **Linux**

Threat Modeling: MITRE ATT&CK, STRIDE   **Event Streaming:** Apache Kafka, Strimzi

Policy as Code: Sentinel, OPA Gatekeeper   **Configuration Management:** Ansible

💼 Professional Experience

DevSecOps Engineer [Bootcamp], KubeCraft   07/2025 — Present | Remote

- Share technical insights from **17 DevSecOps projects** with **600+ member** community, demonstrating production implementations and architectural patterns
- Mentor engineers through code reviews and troubleshooting sessions, helping solve real-world infrastructure and security automation challenges
- Contribute to **3x weekly** community sessions, providing guidance based on hands-on experience building cloud platforms and CI/CD pipelines

DevSecOps Engineer [Self Directed], Self Employed   02/2025 — Present | Remote

- Designed and deployed **17 production-grade systems** including **Backstage developer platform** achieving **70% cost reduction** via hybrid **EKS/ECS** architecture, implementing secure clusters with **Terraform** and **100% Checkov compliance**
- Built event-driven **FinOps platform** using **Apache Kafka** streaming (Strimzi operator) with **OpenCost** for real-time cost monitoring, achieving **<30 second anomaly detection** and increasing **GPU utilization from 60% to 85%**
- Implemented **Policy as Code** governance using **HCP Terraform Sentinel** and **OPA Gatekeeper** on **Kubernetes**, preventing unauthorised resource provisioning and ensuring **EU AI Act** compliance
- Configured multi-cloud orchestration with **Ansible** and **Datadog** monitoring, deploying infrastructure across **AWS/Azure/GCP** in **12 minutes** using **GitOps** workflows
- Automated security scanning across **CI/CD** pipelines using **GitHub Actions**, integrating **Semgrep** (SAST), **Trivy** (containers), **Gitleaks** (secrets), and **OWASP ZAP** (DAST)
- Developed **Model Context Protocol** servers for AI-augmented operations, enabling natural language queries for **Kubernetes** cluster management and automated security incident analysis
- Integrated **Splunk SIEM** with **AWS CloudWatch** and **GuardDuty**, centralising security event monitoring with **Lambda** functions for real-time streaming
- Documented reference architectures creating **open-source** repositories with **700+ commits**, currently developing **AEGIS, FORGE, and SENTINEL** - comprehensive AI security toolkit addressing **OWASP Top 10 for LLMs**

DevSecOps Engineer [Bootcamp], Cyber Agoge   09/2024 – 02/2025 | Remote
- Completed intensive **6-month DevSecOps bootcamp** at one of UK's largest programs - **first graduate in program history invited by CISO to teach fortnightly project implementation lectures**
- Conducted threat modelling exercises using **STRIDE** and **MITRE ATT&CK** frameworks, identifying vulnerabilities and designing security controls for enterprise cloud architectures
- Built and secured **AWS** infrastructure implementing **GuardDuty**, **VPC** security, and **IAM** policies with least privilege access controls across multi-tier applications
- Developed incident response playbooks and implemented **SIEM** solutions for real-time security monitoring with automated alerting for ransomware and DDoS scenarios

Police Constable, Metropolitan Police   02/2022 – 09/2023 | London, UK
- Completed rigorous police training through **Degree Holder Entry Programme (DHEP)**, developing investigative and analytical skills directly applicable to security incident response
- Selected as **Deputy Captain** by cohort peers, demonstrating leadership in high-pressure operational environments
- Held **RV/CTC clearance**, demonstrating proven vetting for sensitive roles and trustworthiness required for handling critical infrastructure

📂 Projects

15+ Additional projects available at noahfrost.co.uk

🌍 Multi-Cloud Orchestration
- Built unified platform deploying **AWS**, **Azure**, and **GCP** infrastructure simultaneously in **12 minutes**
- Implemented **GitOps** workflow with **GitHub Actions** triggering parallel **Terraform** provisioning across all clouds
- Developed OS-adaptive **Ansible** playbooks detecting **RedHat**/**Debian** for consistent **nginx** configuration
- Deployed **Datadog EU** agents providing single-pane-of-glass monitoring with **100% configuration parity**
- Configured unified **SSH** keys and **security groups** across **VPC**, **VM**, and **compute** resources

⚖️ AI Governance Framework
- Built dual-layer governance with **Sentinel** and **OPA** blocking **£10K+/month** unauthorised **GPU** provisioning
- Implemented **HCP Terraform** policies preventing **p3.2xlarge** instances (**£3.06/hr**) before provisioning
- Deployed **OPA Gatekeeper** on **AWS EKS** enforcing **ML model** tracking with clear policy violations
- Achieved **100% compliance** with mandatory versioning and team attribution via **Kubernetes** admission control
- Reduced **EU AI Act** compliance reporting from 2 weeks to 2 hours through automated audit trails

💰 AI FinOps Platform
- Built real-time cost platform processing millions of events through **Apache Kafka** streaming on **AWS EKS**
- Deployed **Strimzi Kafka** operator with 3 brokers and 23 partitions for **GPU** and **API** cost events
- Implemented **OpenCost**, **Prometheus** and **Grafana** achieving **<30 second anomaly detection**
- Prevented **£100K+** monthly overruns through event-driven monitoring of **gpu-utilisation** and **ai-api-costs**
- Configured complete **Terraform** infrastructure with **VPC** networking and **Helm** chart deployments

🚀 GitOps with ArgoCD & Monitoring
- Deployed production **GitOps** workflow using **ArgoCD** on **AWS EKS** achieving **2 minute deployments**
- Implemented **Prometheus** and **Grafana** observability stack via **Helm** charts with pre-built dashboards
- Configured self-healing **Kubernetes** deployments where **ArgoCD** continuously ensures cluster matches **Git** state
- Resolved complex **Prometheus** CRD failures using **ServerSideApply** and debugged **DNS**/**Terraform** issues
- Built **Terraform** modules for complete **AWS** infrastructure: **VPC**, **EKS** cluster, **IAM** roles with least privilege

📦 End-to-End DevSecOps Transformation
- Built secure **CI/CD pipeline** using **GitHub Actions** with integrated **security scanning** across SDLC
- Deployed to **AWS EKS** with **Docker** containerisation and **Kubernetes** orchestration
- Automated security tools: **Semgrep** (SAST), **Trivy** (containers), **Gitleaks**, **OWASP ZAP**, **Checkov**
- Developed **Lambda** functions for **GuardDuty** to **Splunk SIEM** streaming via **CloudWatch** events
- Achieved **100% IaC automation** with **Terraform** provisioning **VPC**, **EC2**, **S3**, and **IAM** security

📇 Certificates

CompTIA Security+   **AWS Certified Cloud Practitioner**

HashiCorp Certified: Terraform Associate

AWS Certified Solutions Architect – Associate — IN PROGRESS

🎓 Education

Law (Criminal Justice) LLM, Northumbria University   09/2023 — Present
Final Term Paused

Criminology BSc (Hons), University of Chester   09/2016 — 09/2020
